DETAILED ACTION

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 7-11, 15-20 drawn to a method/assembly for attaching a cord handle to a bag using an obstruction member which receives an aglet of the cord.

Group II, claim(s) 12, 13, 21-22 drawn to a method for attaching cord handles to bags with the application of a partial vacuum to at least one side wall of the bag.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: group I does not require the special technical feature of group II which is the application of a partial vacuum and group II does not require the special technical feature of group I which is using an obstruction member which receives an aglet of a cord.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
